Education

University of Nebraska-Lincoln

Bachelor of Science in Business Administration

Major: Supply Chain Management and Analytics **Minor:** Economics

University of Nebraska at Omaha

Master of Business Administration

Master of Science in Management Information Systems

Work and Leadership Experience

Software Migration Engineer (Contract) – KForce

2025 – 2026

- Reverse engineered legacy SAS workflows and business logic to support Air Force data systems
- Developed cloud-based data migration workflows using Redshift, Informatica, SQL, and Python
- Configured and hosted cloud instances in Redshift for end-to-end data quality and variance testing
- Developed data migration documentation and schemas to transition data pipelines to Informatica
- Collaborated with technical stakeholders to support enterprise software modernization and migration
- Translated legacy SAS business logic into scalable cloud-compatible batch updates in Informatica

Space Operations Officer – U.S. Army Reserve

2015 – Present

Additional Roles: Company Commander, Executive Officer, Contracting Officer Rep

- Synchronize space-enabled capabilities (SATCOM, GPS, ISR) to support joint-ops and awareness
- Served as logistics commander for 5 years, supporting theater-level transportation and contracts
- Automated 14 logistics processes during Spartan Shield using PowerAutomate, Powershell, and VBA
- Advise on space domain integration, translating capabilities into actionable operational decisions

Data Engineer Auditor (Contract) – RSM

2024 – 2025

- Conducted 20+ audits of financial systems using SAS, SQL, Python to identify regulatory issues
- Automated SQL scripts to conduct continuous testing of data integrity across core systems
- Identified potential SOX, Reg Z, and GDPR conflicts for an array of banking products
- Monitored and modified data pipelines with SQL and Python to conform to regulatory guidance
- Audited backend software development deliverables with continuous testing during the SDLC

Data Engineer – FNBO

2022 – 2024

- Designed automated ETL data pipelines using Python, Airflow, Snowflake, SAS for analytics and reporting
- Streamlined workflows and validations by manipulating complex datasets in Python/SAS
- Modernized legacy SAS workflows into automated cloud-compatible processing pipelines
- Developed data models and created schemas within Snowflake to provide BI data needs
- Built predictive analytics models to measure customer engagement using scikit-learn
- Supported CI/CD deployment and maintenance of data workflows using Git

Certifications and Proficiencies

- Active U.S. DoD TS/SCI Clearance, CompTIA Security+ certified
- PMI Certified Associate in Project Management (CAPM), PMP expected 2026
- Experienced in a breadth of industries, eager to constantly improve/learn, naturally curious
- Languages: Python, SQL, SAS, HTML/CSS, VBA, PowerShell
- Libraries/frameworks: Django, Pandas, Airflow, Openpyxl, Docker, Agile, Jira
- Tools: PyCharm, Git, Postman, APIs, Wireframing, cPanel, VS Code, Cypress, Selenium
- Software: ArcGIS, Informatica, Unica, Excel, Word, Visio, Alteryx
- DBs: MySQL, DB2, PostgreSQL, Snowflake, SQL Server, Oracle
